For Mounting on FORD Tractors

MODEL "G" TRACTOR-MOUNTED DUSTERS WELL-DESIGNED SIMPLE IN DESIGN SPECIAL MOUNTING FRAME

This duster is light in weight and well-braced for satsfactory service and long wear. It includes a low hopper where the dust material is agitated and fed through an adjustable feed opening into a mixing chamber. There it is thoroughly mixed with air, thereby air-floating the dusty material before it enters the blower unit. The blower unit is designed so as to give the most uniform distribution with the highest velocity. The distributor is designed for uniform distribution of dust and consists of a distributor head that can easily be removed for replacement, repairing and cleaning The outlets protrude from the head at an angle which allows the dust material to flow directly from the fan with maximum velocity. The drive for the duster consists of a special dual "V" belt pulley for the tractor power take-off spline shaft which drives the feeder and blower shaft through the medium of "V" belts. COME IN AND SEE ABOUT IT TODAY!!

RECLAIMATION PROJECT A recent article in Newsweek maga-

loft two hours and thirty minutes | share of the costs as the taxpayer finances established

There is something wrong with the Interior Department when they draw up such plans as these. With a much smaller investment per acre of land, they could come into the South and do a lot more good. Not that it is a good idea for the government to go

but as long as they are going in for it, the most should be secured for the taxpayer's dollar.

Through reforestation, terracing, planting of proper grasses in the right place and other soil conservation practices, a lot more land could be put into production in the South for the same amount of money. Natural advantages of climate make this section of the country a much more desirable place to live and make it easier to grow many crops. The Bureau of Reclamation transplanted from the arid regions of the West, should be able to put ten times as much land in production in the South with the same amount of money.

SCHOOL PLANNING NEEDED Considerable talk has been heard lately around the county about putting a tenth grade in some of the better junior high schools. Most prominently mentioned are Goodman, Zion Chapel and Mt. Pleasant.

Before the county school board adopts such an idea, it should develop a long range plan. Charles R. Colbert, who spent \$30 million as director of the Office of Planning and Construction for the (New) Orleans (La.) Parish School Board said, "Progressive improvement implies a continuing process. Therefore, a long range plan which is flexible and which can be molded to fit changing demands is essential."

He proposed a long-range school building program divided into four categories: what is needed to develop a balanced graduate; what existing assets the program may build upon; what the community can afford The Chamber of Commerce is the for educational facilities and how to achicandidate who represents the city. Through eve what is needed. Colbert urged commudustry's hand and asks it to locate in istrative guidance of competent planners and architects in the formulation of school

"Good school buildings can not be built upon the shifting sands of jeaulous principals, competing staff members and conflicting community groups, Colbert added. "Independent authority must be vested in the hands of competent professionals. Their findings can be weighed by the school boards and the public.'

Before any more changes are made in county and city school systems here, the responsible boards should have before them a long range plan to follow. Then they confidence in the adhesive qualities mately \$5 billion in construction. Total cost should follow the plan as money becomes

Without considerable study, no one can say whether or not it would be cheaper to finders-keeps bill was considered That is a lot of money to get one acre start a tenth grade in some of the county public property during the flight, a of land into production. Naturally everyone schools than it would be to transport the Janie arrived at her Jersey City in Coffee County pays his proportionate students to one of the high schools already

Expense is not the only item to be considered, either, as the training the student will receive has to be thought of. Can a pupil get as good training one place as the other. The best job possible with the limited funds available must be done. It is of vital importance to the county that the school board looks before it leaps on this question.

The experimental setup involves tracking a target with a beam of light and measuring the time i takes subjects to change over t John Ericson a new target suddenly presented Certain types of written problem are also being presented which will indicate the degree of fixation in

Preliminary results suggest that he emotional make-up of the individual may be in part responsible for the fixation and it is expected that the study may aid in setting up a program designed to over come the problem. This would be particularly suited for gunnery training in the Armed Forces. At present college students are being used as experimental subjects, but present plans call for the testing of military personnel later

Human Thermometer Can Tell by Color

ROCHESTER, N. Y. - Walter Ringwood is a human thermometer who can tell temperature by color. Ringwood can tell the temperacal ware firm, has the job of nelting gold and alloys at approxmately 2,000 degrees fahrenheit. Ringwood can tell the tempera-ture of the molten mass of gold alloy within five degrees simply by peering at its orange-red color. There's a certain mixture of red and orange which means the golden soup is just right for the pour ing process. If there is too much red, the alloy is too cool: too much orange means that it is too hot. When checked with a precisionbuilt pyrometer, Ringwood's temperature estimates prove almost erfect. Pyrometers are not used nsistently in making optical ware because they are too awkward for

roduction purposes. Fans Cleaned LA FONTAINE, Ind.—The score the game seemed unimportant o fans at the Banquo-La Fontaine High School basketball game. The fans were the ones taken to the

I want to again express my deep appreciation fo your splendid vote of confidence and support in the May 4 primary. The short interval lapsing between May 4th and June 1st primaries makes it impossible for me to see all of you, so I wish to take this opportunity to earnestly solicit your continued support and influence in the June 1st runoff.

In order that you may cast a fair, honest and intelligent ballot in the June 1st runoff, the following issues in this campaign must be clearly understood. I have supported Governor-elect Folsom for many years. My support of him goes back many years before I decided to run for public office. It is of record that I voted for him both for Congress and for Covernor

each time he has campaigned.

I publicly stated my past and present record of support for the Governor-elect at a political rally held by the Veterans School in Elba prior to the May 4th primary. My worthy opponent spoke AFTER me, but gave no endorsement of Governor-elect Folsom. I have repeatedly told the voters of Coffee County

of the statement I gave the Dothan Eagle which was printed on Thursday afternoon, March 25, 1954. That statement expressed my endorsement of the program of candidate Folsom, who was victorious in the primary. In the same edition of this paper, my worthy opponent promised very weak support of Governor Folsom's My friends this is a public record. What's the mat-

ter now? Why has my honorable opponent changed his mind in the last few weeks, as expressed in the May 13 edition of The Elba Clipper? Has he really changed his mind and intends to support Folsom's program? His promise of support is still very weak. Read it again for yourselves and see!! Who the governor-elect is, is no issue in this campaign. What is vitally important to the voters of Coffee County is "Which candidate is in a position to do

the most that is for the good and betterment of Coffee County?" The Governor alone cannot carry out his program. He must have the support of the State Legis-

How does my honorable opponent stand on the Relative Responsibility Act? It is said that more than 20,000 people have been cut off by that act, from drawing pensions, and which they badly needed.

I have repeatedly stated that I wholeheartedly favor the repeal of this Act, so that our old people may be taken care of. My opponent stated in the Friday, April 30th edition of The Enterprise Ledger, that he opposes the re-

peal of this Act. A vote for me, O'Neal Griswold, will mean a vote for helping our old people. I am opposed to paid vacations, and give you my pledge that I will not accept a vacation with pay if elect-

ed as your Representative. To do so means accepting money that is not earned. It means accepting money that is hot earned. It means accepting money that is badly needed for use for the public good of this great State of Alabama and of this great Coffee County.

If I am elected your Representative, I will do my utmost to get Coffee County its share of farm-to-market roads; I am for better schools and school facilities. I will work for more industries in Coffee County. ties; I will work for more industries in Coffee County, and I shall oppose additional taxes, as I fully believe the betterments that I shall work for can be accomplished without additional taxes.

I earnestly solicit your vote on June 1 and pledge that I shall work for the betterment of Coffee County and the great State of Alabama at all times If elected your Representative.

Griswold (Pd. pol. adv. by E. O. (O'Neal) Griswold, Enterprise)
